

DoubleWave

Latest Double Channel Shock Wave Device

Double Channel Shock Wave Machine

- Dual channel electromagnetic shock wave is a new instrument. It can treat two people or two body parts at the same time. Double handles, dual interface, double selection. New design, unique in the world.

Technical Parameters

Model	DoubleWave
Frequency	1 - 16Hz
Energy	5 - 200mj
Power	200W
Voltage	AC110-240V(Wide Voltage)
Screen	8-inch touch screen
Handle	2pcs digital handles
Treated head	14pcs(including 4pcs special heads for ED treatment)

Advantages

Two handles can work at the same time

More efficiently, if one handle goes wrong, the other still work

Storage tank behind the machine

Digital handle adjust the frequency and energy

Smart C mode and P mode for choice

Display real temperature and total impact counter

Six different preloads to choose

The Interface

Simple interface, easy to operate.

Handle and Treaded Heads

It is equipped with 2 digital handles and 14pcs treated heads including 4pcs special heads for ED therapy. The handle can adjust the frequency and energy, show the real temperature and total impact counter.

Partial Treated Area

Apply to 10 different body parts like hand, shoulder, ED and other body parts.

APPLICATION

- 1 Sports injury recovery
- 2 Rehabilitation therapy
- 3 Physiotherapy pain relief
- 4 Cellulite reduction
- 5 ED treatment

Shock Wave Physiotherapy

Shockwave therapy is a multidisciplinary device used in orthopaedics, physiotherapy, sports medicine, urology and veterinary medicine.

Its main assets are fast pain relief and mobility restoration. Together with being a non-surgical therapy with no need for painkillers makes it an ideal therapy to speed up recovery and cure various indications causing acute or chronic pain.

Shock Wave for Cellulite Reduction

Shockwave, it's a low energy radial waves scientifically proved to have a large impact on collagen structure and the skin connective tissue, improving blood circulation and the metabolism of fat cells. The mechanical massage effect reduces the edema and improves the lymphatic drainage of toxins. It stimulates collagen formation, while the skin becomes more elastic and its firmness is visible after only a few treatments.

Shock Wave for ED

Most men suffering from erectile dysfunction have vascular problems affecting the vessels that supply blood to the cavernous bodies of the penis, resulting in a decreased ability to develop and maintain an erection.

Shockwave Therapy for ED of this type can be a highly effective treatment. The shockwaves are focused onto the area to be treated creating new blood vessels in penile tissue, enabling patients to achieve and maintain firm spontaneous erections.

This instruction only for reference

1. Target to spongy tissue in 5 different areas.
2. 300 impacts per area , total 1500 impacts in one treatment.
3. Twice a week, treat consistently for 3 weeks, then stop for 3 weeks, And start next course.
4. Should be more impacts at the top end of penis, and Less impacts at the bottom of penis.
Vascular-related ED problems rather than just treating the symptoms.

Feature

1

Comfortable, noninvasive and safe to relieve pain

2

Improve the blood circulation, meanwhile remove body fat

3

ED therapy, increase blood flow and boost sexual performance

4

Easy operation, easy to maintain

5

No harm for body, suitable for any skin
